# Health and care: incoming program autumn

## Detailed overview

### MIDWIFERY - NURSING - OCCUPATIONAL THERAPY

#### OBJECTIVE

The main aim of our incoming program is to offer exchange students possibilities to experience their profession (as well theoretical challenges as practical) in an international context. Students start their programme with a compulsory interprofessional module and choose at least one other module.

#### WELCOME COURSE

In this programme, the welcome course 'Health care as a global profession' is compulsory. In this course we focus on (inter) cultural differences related to the perception of health and care. We also train your intercultural communication skills and learn you how to deal with difficult and unexpected situations. Last but not least, we challenge you in your thoughts and acts about local and

global citizenship. This course contains live and online lessons. All incoming students as well as our outgoing students our joining in this course.

#### ORGANISATION

Our programme is organised in autumn semester and starts on 14th of September. In our programme we have a compulsory and optional part and interprofessional and professional part. Below you find the course menu of our different professional fields. Students who are interested can also follow our online evening course Social Entrepreneurship or extend their stay in Ghent till the End of January to follow our course Interdisciplinary Health Promotion and Interdisciplinary Programme on Palliative and End-of-Life Care.

*Expanding globalisation and the expansion of the European Union, with greater freedom of movement means that healthcare professionals will, increasingly, be working with colleagues and clients/patients from different countries and cultures.*

*Our programme offers a unique opportunity to meet students and staff from numerous countries, cultures and professional backgrounds to discuss and debate issues concerning the present and future role of healthcare workers.*

*We hope that your participation in this programme will turn out to be an exciting learning experience for you and will challenge both your professional and personal development.*

STUDENTS WITH INTEREST CAN ALSO FOLLOW ONE OF THESE COURSES

## Creating a Social Entrepreneurship to fight poverty

### KEYWORDS

social innovation/incubation/poverty/Human Centered Design/ SDGs/ Impact/sustainability/team work/reflective learning/interdisciplinarity/empathy/compassion/ change.

### SHORT DESCRIPTION

“No Poverty” is the Sustainable Development Goal number 1. Poverty is a global problem on many levels. Living in poverty causes inequality and hardship in nutrition, education, health and various other aspects. Poverty is often inherited. Social entrepreneurship (where human and environmental goals are an equal level with business goals) is one way to address these issues.

Students work in interdisciplinary teams to explore, research and understand real world problems around poverty and empathize with people to solve problems and create solutions. Creativity and the

ability to develop better solutions together are key competences. This course follows the principles of Human Centered Design and Lean Startup. Students will be guided through a process to understand the challenge and to create a solution concept and a business model with impact. They will be confronted with challenges from Nepal, Portugal, Suriname, Armenia, Russia, Ukraine, Trinidad and Tobago.

#### Dates

10 weeks

October 2022 till mid-December 2022

# Interdisciplinary Health Promotion

## KEYWORDS

Social determinants of health/  
interactive game/different popula-  
tion groups/developing health  
promotion intervention

## SHORT DESCRIPTION

How does socioeconomic status  
affect health? Why do people are  
healthier than others? Why do pa-  
tients comply (or not) with our trea-  
tment plans?

Are you interested in the answer or  
do you ask yourself the same ques-  
tions? Then the intensive course in  
Interdisciplinary Health Promotion  
is right for you!

Students work together on the de-  
velopment of a health promotion  
intervention using the Intervention  
Mapping protocol (IM) on a topic of  
choice (from healthy eating, binge  
drinking, smoking to brushing be-  
havior and more!).

Interdisciplinary Health Promotion  
provide a better understanding of  
the factors that influence peop-

le's health behaviour en supports  
you to familiarise with the eviden-  
ce-based protocol for health pro-  
motion intervention In this module  
we offer a social programme (lun-  
ching together, visit in the city of  
Ghent, ...).
